JOURNAL OF TROPICAL PLANT PHYSIOLOGY

(JTTP) is the official journal of the Malaysian Society of Plant Physiology, and publishes peer-reviewed research papers dealing with all aspects of basic and applied areas of tropical related plant science. The journal covers a range of disciplines from molecular and cellular physiology through whole plant physiology to ecosystem physiology. The main focus of the journal is to disseminate original research information in biotechnology, cell and developmental physiology, crop physiology and physiological ecology, environmental stress physiology and adaptation, plant biochemistry, plant nutrition, postharvest physiology, reproductive physiology and whole plant physiology. The aim of the journal is to promote research and development especially in tropical plant biology.

Journal of Tropical Plant Physiology is published once a year. The editorial board reserves the right to select articles or information submitted for publication in Journal of Tropical Plant Physiology.
